Leather
We have placed great emphasis on finding suppliers who manufacture leather in a sustainable way. In our range you can choose from beautiful skins of controlled origin that are produced with ecologically sustainable methods.
Our leather is all Semi aniline leather with a soft touch and natural look and structure and at the same time more maintenance-friendly.

Fabric
We always strive to have the finest fabrics from the leading suppliers. We have fabrics produced from recyclable materials, and at the same time live up to our high requirements for wear and tear, fading, etc.

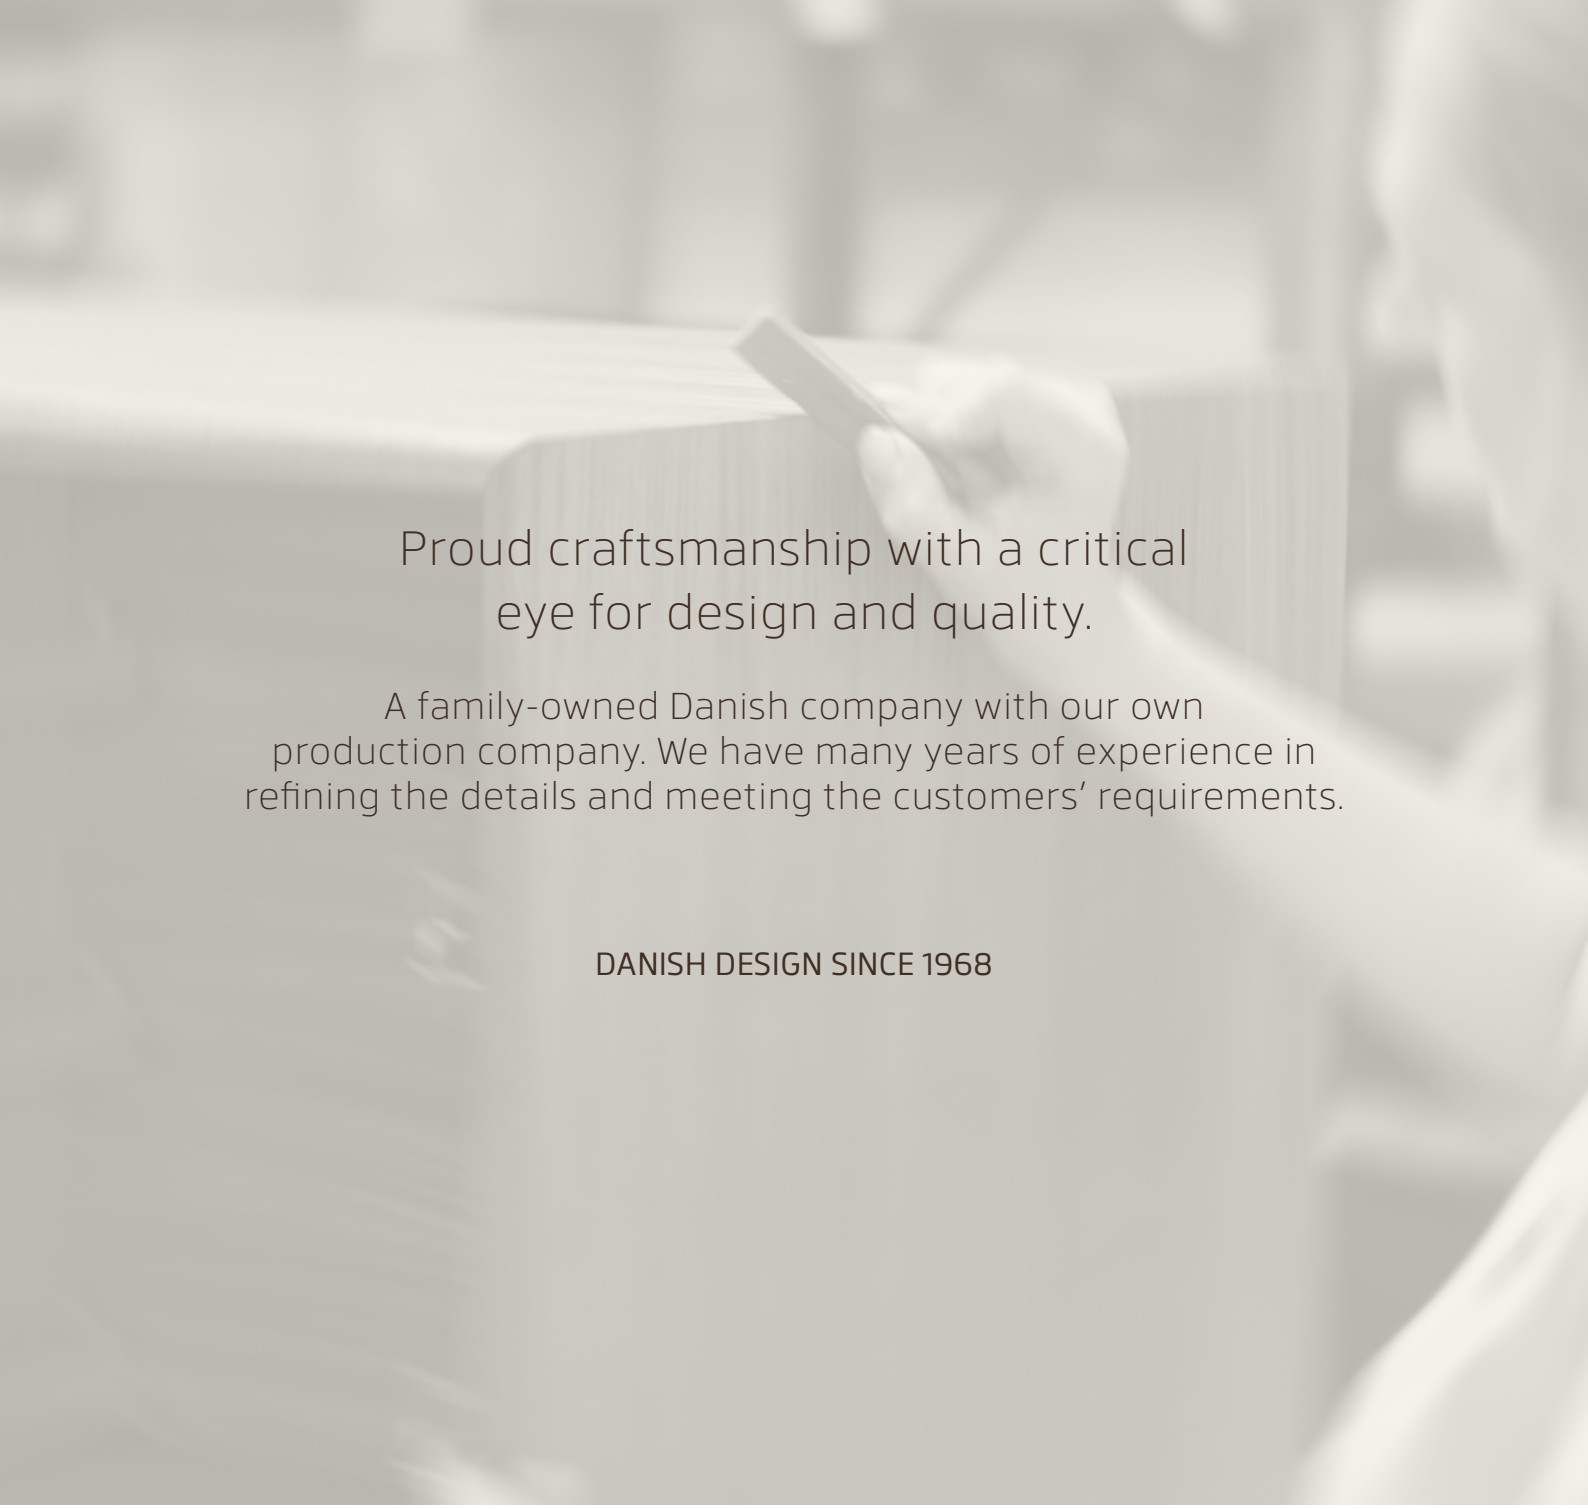

In our selection you will easily find a fabric and a colour that suits no matter which chair design you choose and whether you prefer light Nordic woods, or maybe black or walnut.

Grain
Grain is a post-consumer recycled polyester bouclé fabric that adds warmth and dimension with a modern and elegant, irregular texture. Grain is fire retardant.

Devide
Devide is a beautiful Italian wool quality with a perfect melangé effect that adds a touch of classic luxury to any dining room. Fire retardant.

Cura
Cura is a two-coloured upholstery fabric made from 98% post-consumed recycled polyester. It combines modern performance with a warm, casual aesthetic and a soft, voluminous touch. Fire retardant.

Rhythm and Partner
Fabric Rhythm and Partner is a true boucle beauty. The tone-in-tone dyed yarns create a full and rich optic sense. The colours are chosen in subtle colour palette with a high-class vibe.

Proud craftsmanship with a critical eye for design and quality.

A family-owned Danish company with our own production company. We have many years of experience in refining the details and meeting the customers' requirements.
